

Engineering Solutions Designed for Performance

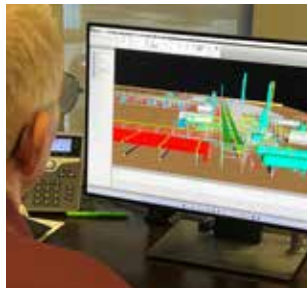

Innovative engineering built to optimize operations, unlock value, and deliver results.

With more than 40 years of industry experience, BCKK provides engineering and project management solutions for gas producers and energy companies. Our team develops innovative, application-specific designs that improve efficiency, reliability, and project economics.

Full-Scope Engineering

- Process, mechanical, civil/structural, and electrical engineering
- FEED studies and detailed design
- Procurement support and vendor integration

Advanced Design & Optimization

- Process simulation and modeling
- 3D design and constructability reviews
- Power system and equipment studies

Project Lifecycle Support

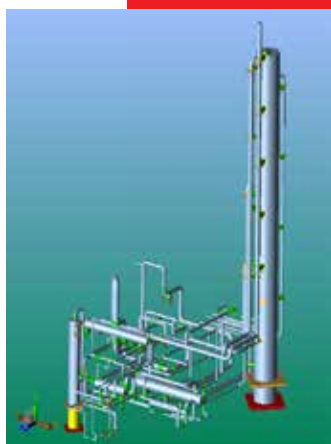

- Concept-to-completion engineering
- Commissioning and startup support
- Performance optimization

These integrated services help reduce project risk, streamline schedules, and improve constructability.

Engineering That Powers Integrated Energy Solutions

- Mechanical Engineering
- Process Engineering
- Civil/Structural Engineering
- Electrical Engineering
- Project Management
- Piping & Design
- Power System Modeling & Design
- Short Circuit, Load Flow & Arc Flash Studies
- Distribution Gear (Transformers, Switchgear, Motor Controls) Specification & Procurement
- Power Distribution Center Specification & Procurement
- FEED Studies
- Procurement & Expediting
- Process Simulation
- Piping Studies & Stress Analysis
- P&ID; Development
- 3D Modeling
- Participate in PHA Evaluations
- Control System Design & Programming
- ASME Pressure Vessel Calculations
- Commissioning Assistance
- Startup Assistance

Safety Commitment

Safety is embedded in every phase of our work.

- ISNetworld member with on-site safety leadership
- Daily safety assessments and JSAs
- ASME, API, NFPA, IEC/NEC-aligned designs
- PHA/HAZOP and commissioning reviews
- BCK's quality management system is ISO compliant

From concept to startup, BCK engineering delivers reliable, efficient solutions that maximize project value.

ABOUT BCK

As a leading technology solutions provider and full-service EPC firm (concept, engineering, design, fabrication, manufacturing & construction), partnering with BCK as a single-source provider allows for project efficiencies, environmental benefits and cost savings.
